Ess. - Business Essential Record	H - Hardcopy E - Electronic D - Database S - Scanned M - Microform
---	---	---	--

The Agency will follow retention periods for common records as listed in the most current State of Alaska General Administrative Records Retention Schedule (GARRS), unless those records have been listed on this schedule.

Unless otherwise noted, all records series are retained on a Fiscal year basis.

All records that have potential permanent legal and historical value may be reviewed by the State Archivist for possible permanent retention in the State Archives in accordance with AS 40.21.030.

Unless otherwise indicated, all records series are non-confidential.

Statutory/Regulatory Authority: AS 46.15.020-.970; 11 AAC 05.010; AS 41.08; 11 AAC 93.040-.970; AS 35.05.965; AS 46.17.010-.900.

The Division of Mining & Water Management is responsible for making available the use and development of the State's mineral and water resources. The goals of the Water Resources Section (WRS) are: to manage the State's water resources held in trust through timely and responsible adjudication of water use applications; to ensure safety of dams; to collect, interpret, and disseminate water resource data essential for domestic and commercial uses and for prudent development of Alaska's resources, and; to provide leadership in the cooperative resolution of water management issues. The WRS has the statutory mandate to determine and adjudicate rights to the use of Alaska's waters and to administer the Water Use Act.

Under 4 AAC 59.005, it is the responsibility of agencies to ensure that records created and maintained in electronic systems remain accessible and durable for their prescribed retention period. This requires addressing the issues of periodic media refreshment, digital migration strategies and security plans. Backups produced for system recovery purposes do not serve a recordkeeping function or substitute for archived business essential duplicates.

Pursuant to the provisions of AS 40.21, the records listed below are approved for retention and disposition as indicated.
