The Division of Retirement and Benefits develops, manages and administers State employee retirement and investment plans. The goal of the Divison is to administer the retirement and benefit plans efficiently by: maintaining accurate records, distributing benefits in a timely manner, protecting the participants' assets, negotiating benefit plan rates, assisting employers and employees to make informed decisions, and providing the maximum in service at a minimum in cost to the retirement trust fund and each participant. NOTE: Per 4 MC 59 it is the responsibility of departments to ensure that records created and maintained in electronic systems remain accessible for their full retention period. This requires taking into account the issues of refreshing, migration, security duplicates, and analog/digital crosswalks in planning, implementing, and administering the electronic system. Back-ups produced for system recovery purposes do not serve a recordkeeping function and do not substitute for security copies of records.

Pursuant to the provisions of A5 40.21 and 4 AAC 59, the records listed below are approved for retention and disposition as indicated.
